

ARC to Optical Audio Converter

Audio Extractor Adapter Splitter

User Manual

Product Overview

The ARC Audio Converter connects to an ARC-compatible TV, allowing the TV's audio to be transmitted to a sound system via the converter's built-in optical digital audio cable. This product eliminates the need for additional cables and serves as a bridge between the TV and sound system, resolving interface incompatibility issues. It is ideal for home theaters, audio engineering, educational institutions, training centers, conference rooms, electronics stores, and other settings.

Product Features

- ◆ Supports ARC input
- ◆ HD plug connector
- ◆ Built-in optical digital audio output cable
- ◆ Built-in USB power cable
- ◆ Supports 24-bit/192kHz audio sampling rate
- ◆ Supports Dolby 5.1 and DTS 5.1 audio formats
- ◆ Plug and Play-No additional adapters required

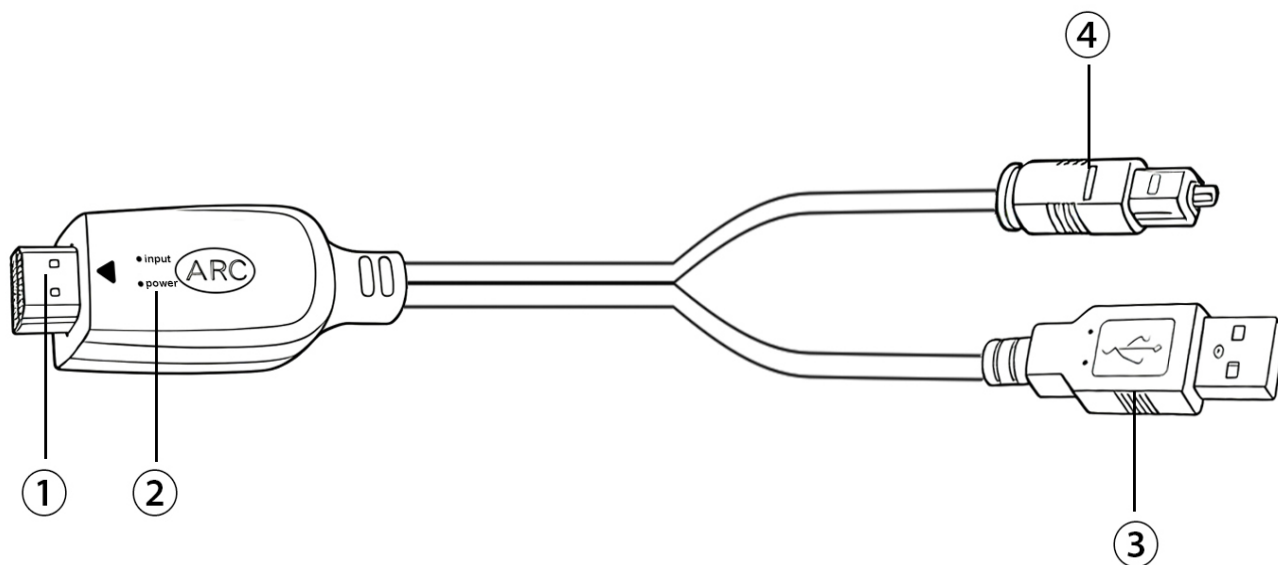

Product Specifications

Input Interface.....	ARC
Output Interface.....	Optical
Supported Audio Formats.....	PCM;Dolby Audio;DTS
Power Interface.....	USB Cable
Voltage and Power Consumption.....	DC5V/15mA
Housing Material.....	Plastic
Color.....	Black
Operating Temperature Range.....	-40~+85°C
Storage Temperature Range.....	-60~+95°C
Operating Humidity.....	30% to 75% RH(non-condensing)
Storage Humidity.....	40% to 85% RH(non-condensing)
Storage Humidity.....	40% to 85% RH(non-condensing)
Dimensions.....	105*2.65*1.3(cm)
Weight.....	48g

Package Contents

Converter.....	1PCS
User Manual.....	1PCS

Physical Interface Diagram

- ① HD Plug - Connect to the TV's ARC interface (do not connect to a sound system)
- ② Indicator Lights POWER/INPUT - The "power" indicator will illuminate when the ③USB port is connected to a power source. - The "input" indicator will illuminate when the ①HDMI ARC port is connected to a TV.
- ③ USB Power Cable-Connect to the TV's USB interface or another device's USB port.
- ④ Optical Digital Audio Output Cable - Connect to the sound system.

NOTE

The ARC audio converter Only for TV with “ ARC ” interface. Not for “ HDMI eARC ” or “HDMI ” interface.

Connection and Operation

1. Plug the HDMI cable from the ARC Audio Converter into the ARC-labeled port on your TV.
Heads-up: If you plug it into the wrong HDMI port, you won't get any sound!
2. Connect the converter's USB cable to a USB port on your TV or another device to power it on.
3. Run the optical cable from the converter to your sound system's optical input, and then switch your sound system to the correct input channel.

Important

You also need to go into your TV's settings and set the audio output to "ARC." If you don't, you still might not hear anything. (Check your TV's manual if you're not sure how to do this.)

Trouble Shooting

Before powering on, ensure all connections are correct.
Common issues and solutions are listed below:

No.	Symptom	Cause and Solution
1	Indicator Light Off	1. No power supply: Check if the USB cable is connected to a USB port. 2. Power source not turned on: Ensure the device connected via the USB cable is powered on. 3. HD interface not connected: Verify the HD interface plug is properly connected to the TV. 4. Connected device is not the TV: Ensure the HD interface plug is connected to the TV.
2	No Audio Output	1. The TV is not displaying any content. 2. The TV is not configured for ARC output. 3. The audio format is not supported. Please set the TV to PCM, Dolby Audio, or DTS output mode. 4. The sound system does not support Dolby Audio or DTS decoding.
